

JUGAL PARMESHWAR PAKHARE

Software Engineering | AI/ML

Jalna, Maharashtra, India | jugalpkhr@gmail.com

portfoliojugal.vercel.app | github.com/jugal4096 | linkedin.com/in/jugal-pakhare-a58653359

PROFESSIONAL SUMMARY

B.Tech Information Technology student with hands-on experience in **software development, machine learning, and data-driven applications**. Skilled in **Python, C++, SQL, Data Structures, Algorithms, Object-Oriented Programming, Machine Learning and databases**. Experienced in building web applications and machine learning systems involving data preprocessing, model development, evaluation, and deployment. Strong interest in developing reliable and scalable software solutions.

EDUCATION

Government College of Engineering, Chhatrapati Sambhajanagar (GECA) **2024 – 2027**
B.Tech. in Information Technology *Chhatrapati Sambhajanagar, Maharashtra*

Government Polytechnic, Jalna **2018 – 2023**
Diploma in Civil Engineering | Percentage: 85.63% *Jalna, Maharashtra*

Maharashtra SSC Board **2017 – 2018**
Secondary School Certificate (SSC) | Percentage: 84.80% *Jalna, Maharashtra*

EXPERIENCE

Larsen & Toubro (L&T) **Oct 2023 – Jul 2024**
Diploma Engineering Trainee / Junior Engineer Trainee *Meerut, Uttar Pradesh*

- Worked on the Delhi–Meerut Regional Rapid Transit System (RRTS), gaining experience in large-scale engineering project execution, technical coordination, documentation, and process adherence.
- Worked in a structured project environment requiring attention to safety, quality, documentation, coordination, and disciplined execution of engineering activities.

DEPOLYED PROJECTS

PopulationVision – AI Population Forecasting System github.com/jugal4096/PopulationVision
Python, Pandas, NumPy, Scikit-learn, Machine Learning, Data Analysis

- Built an AI/ML-based population forecasting system for India using historical demographic data and machine learning workflows.
- Implemented data preprocessing, feature engineering, model training, evaluation, prediction, and demographic data analysis.
- Structured the application around a complete machine learning workflow from data preparation through model prediction.

RailAI – Railway Intelligence and Delay Prediction github.com/jugal4096/railai
Python, Machine Learning, Data Analysis, Rule-Based Systems

- Developed a railway intelligence system for the Jalna–Chhatrapati Sambhajanagar corridor to analyze train movement, delays, and crossing conditions.
- Combined rule-based railway operating logic with machine learning for train crossing and delay prediction.
- Structured the system into data processing, operational logic, prediction, and application components.

Task Tracker – MERN Application github.com/jugal4096/taskt
MongoDB, Express.js, React, Node.js, REST APIs

- Built and deployed a task management application using MongoDB, Express.js, React, and Node.js.
- Implemented RESTful APIs, CRUD operations, database integration, frontend–backend communication, and application deployment.

GECA Student Academic Planner github.com/jugal4096/SGPA-calculator-website
JavaScript, Firebase, Firestore, HTML, CSS, Capacitor

- Developed an academic platform with SGPA/CGPA calculation, dashboard functionality, authentication, and persistent student data.
- Implemented guest and authenticated workflows using browser storage, Firebase Authentication, and Firestore.

TECHNICAL SKILLS

Programming: Python, C++, Java, SQL

Core Computer Science: Object-Oriented Programming, Data Structures, Algorithms, DBMS, Computer Networks

Machine Learning: Pandas, NumPy, Data Preprocessing, Feature Engineering, Regression, Classification, Model Evaluation

Web Development: React, JavaScript, REST APIs, HTML, CSS

Databases: MongoDB, SQL, Firebase Firestore

Tools: Git, GitHub, Docker, VS Code, Jupyter Notebook, Linux
